

Marsh Sediment In Translation (MSIT) Collaborative Project Initial Survey

Thank you for taking the time to complete this survey. We will use this information to plan the kickoff workshop.

* Required

1. Name *

2. Where do you work? *

3. What is your position within your organization?

4. Which of the following best describes your role?

Mark only one oval.

- Land manager; I oversee a current marsh project.
- Consultant; I help design marsh restoration and conservation projects.
- Coastal planner; I help craft policies and/or regulations for marsh management.
- Coastal planner; I help craft policies and/or regulations for sediment management.
- Scientist; I conduct research pertaining to wetlands.
- Regulator; I issue permits for coastal projects.
- Other: _____

Applications to your work

For this section, your answers do not need to be exhaustive lists. If you participate in the workshop, it will largely focus on making connections between the data on sediment transport processes and the decisions made in wetland management, restoration, and conservation projects.

5. Provide 1 or 2 recent examples of decisions you faced where you lacked information on sediment transport in and to marshes.

6. When faced with a decision where more information is needed, where do you turn for information? Select all that apply.

Check all that apply.

- Publications or Reports
- Other people in my field
- Researchers who study this area
- Similar projects in other geographical areas
- Other: _____

7. How do you use information about sediment transport and marsh accretion in your work?

8. Do you use any software, modeling tools, or published model results to support your decision making? If so, which ones?

9. The success of this project heavily relies upon the input and feedback of kickoff workshop participants. With that in mind, we want to be clear about the expectations and time commitment required. Participants will be expected to attend the workshop, to subsequently provide a review of documents and other draft end products (2-6 hr total, July - Oct), and to be available for 1:1 consultation on topics of their expertise if needed. The workshop will consist of two 3-hr sessions spread over two days. We anticipate those days will be April 19, 28, and/or 29. After the end products are developed, there will be a final workshop that all are welcome to attend to learn about and discuss the project results (likely Feb 2022). Given this timeline, please indicate your level of interest. If none of the options fit your preferences, feel free to describe an alternative under "Other."

Mark only one oval.

- I am not able to participate at this time beyond this survey.
- I am interested and available to participate in the kickoff workshop and subsequent review, and I am available during the proposed workshop days in April.
- I am interested and available to participate in the kickoff workshop and subsequent review, but I am not available during the proposed workshop days in April.
- I am not able to participate in the kickoff workshop, but please keep me updated on the final workshop.
